

## Special Issue

# Activatable Probes for Biosensing, Imaging, and Photomedicine

### Message from the Guest Editors

Activatable probes and sensors that amplify or boost signals in response to the target of interest have a critical role in biosensing, imaging, and photomedicine. This Special Issue focuses on activatable sensing technologies through the use of fluorescence imaging, chemiluminescence imaging, afterglow imaging, photoacoustic imaging, optical coherence tomography, super-resolution optical imaging, near infrared imaging, nonlinear optical imaging, photomechanical actuation, photothermal actuation, and photo thermomechanical actuation, etc. The activatable probes and sensors can be developed and used in such strategies and technologies but are not limited to the methods mentioned above. Contributions may also include different aspects in terms of design, development, and validation of biosensors. The aim of this Special Issue is to highlight the advanced processes on the development of various activatable probes or sensors as diagnostic and therapeutic platforms for biomedical applications. Review articles and research articles related to the above activatable biosensing technologies are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
