

## Special Issue

# Micro-/Nano Biomedical Point-of-Care Devices

### Message from the Guest Editor

Medical diagnostics play an important role in patient care. Today's issues include the speed of diagnostics (as samples are sent to a central lab for diagnostics), the price of the tests, as well as complexity of operation. However, COVID-19 has shown us the way to home-based testing kits, although with limited accuracy and applications. As such, there is a greater need for faster and more complex point-of-care devices which can be used in clinics, remotely or even at home, without the need for specialized laboratories. Devices can be simple microfluidic or paper-based test kits for single analysis or can also be more complex systems detecting multiple biomarkers. To fully utilize the possibilities of point of care, automation and remote diagnostics should also be considered—think of tele-medicine. Point-of-care devices also aim to prevent medical problems by being able to achieve advanced detection of biomarkers before the manifestation of the disease, which means an increase in sensor sensitivity to detect low concentration of biomarkers.

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Embase, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
