

Special Issue

Advances in the Biosensor Technologies for the Detection of Disease Biomarkers

Message from the Guest Editors

This Special Issue, "Advances in the biosensor technologies for detecting disease biomarkers," focuses on the recent developments in biosensors that allow for sensitive and highly specific detection of disease biomarkers (DNA, RNA, antigen, antibody, small molecules). We invite submissions of research and review articles that may help to advance the field of biosensor technologies.

- microarray
- bacteria
- viruses
- biomarkers
- DNA
- miRNA
- hybridization
- antigen
- antibody
- small molecules

Guest Editors

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
