

## Special Issue

# In Vivo Imaging and Sensing of Biomarkers

### Message from the Guest Editors

In vivo bioimaging has become an essential tool in modern biomedical research and medicine. Mounting evidence has shown the unprecedented role of in vivo bioimaging in that biosensors are administered to living subjects for specifically detecting important disease biomarkers and displaying their spatial distribution non-invasively. In recent decades, a radical development has been made for in vivo sensing of various disease biomarkers. In vivo imaging and sensing will become an indispensable tool in precision medicine and can provide more accurate diagnosis and real-time treatment monitoring directly through sensing the underlying molecular events.

This Special Issue aims to cover recent advances in the development of in vivo imaging using clinically translatable modalities such as MRI, nuclear imaging, optical imaging, etc. Given the broad spectrum of technologies existing in this field, we will focus specifically on how imaging science and chemistry can be designed based on cellular/molecular biology to invent imaging methods and probes for sensing previously undetectable biomarkers and how these new innovations are translated to clinical studies to advance the medical field.

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -  
Q1 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
