

Special Issue

Micro- and Nanopore Biosensors

Message from the Guest Editor

Micro- and nanopore biosensing is a fascinating interdisciplinary research frontier encompassing life science, physics, chemistry, and today even informatics. It measures electrical or optical signals upon translocation or trap of analytes in a specially designed hole in either a solid-state or a biological membrane that allows identification of single molecules and particles of virtually any size from cell to nucleotide in electrolyte solution. Significant efforts have been devoted in the last decade to making use of the simple and versatile sensor mechanism for a vast range of analytical applications, such as particle analyses, cancer diagnostics, viral screening, proteomics, and genome sequencing. This Special Issue aims to showcase cutting-edge research and reviews on micro- and nanopore sensors for its meaningful and wonderful prospects.

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Laustruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
