Special Issue

Advances in Nanomedicines for Disease Diagnosis and Therapeutics

Message from the Guest Editors

Nanomedicines have become competent candidates for the diagnosis and therapy of different diseases (e.g., tumors, neurodegenerative diseases, bacterial infections, cardiovascular diseases) both at bench and bedside. The state-of-the-art diagnostic modalities include fluorescence imaging, computed tomography (CT), magnetic resonance imaging (MRI), ultrasound imaging (US), single photon emission computed tomography (SPECT), and positron emission tomography (PET), while the therapeutics are composed of chemo-, photo-, chemodyanmic-, gene-, and immunotherapy and their hybrids. Generally, nanomedicines are composed of a biocompatible matrix and diagnostic/therapeutic moieties, in which the former offers long circulation time and targeting of disease tissues, and the latter yields diagnosis and treatment functions. Moreover, smartness has been customized for nanomedicines, enabling them to selectively respond to specific diseases by physical/chemical/biochemical intereaction with the pathological microenvironment, leading to highly sensitive and efficient diagnostic and therapeutic outcomes.

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
