

Special Issue

Systems for the Early Detection of Pathogenic Bacteria

Message from the Guest Editor

This Special Issue will be dedicated to the rapid detection of bacteria and pathogens. The detection can take place for human or animal bodily fluids, e.g., milk, blood, urine, cerebrospinal fluid, *etc.*, or for foodborne pathogens. An emphasis will be set to original techniques that can lead to portable devices that are able to selectively detect harmful bacteria in synthetic or complex media and with the fastest detection rate.

Guest Editor

Prof. Dr. Laurent A. Francis

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Lastruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore -
Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
