Smart, Connected, and Portable Biosensors and Bioelectronics for Advancing Human Healthcare, Disease Diagnosis, and Therapeutics

Message from the Guest Editors

Research and development related to Smart, Connected, and Portable Biosensors and Bioelectronics have been a game-changer in the fields of diagnostics and health management. Unlike conventional biosensors, these devices allow rapid, accurate, and on-site detection of biomarkers, which helps to prevent disease spread by the source control. This Biosensors Special Issue on “Smart, Connected, and Portable Biosensors and for Advancing Human Healthcare, Disease Diagnosis, and Therapeutics” is dedicated to reporting advances towards addressing current challenges and the future scope of the field of portable biosensors and bioelectronics.
