

Special Issue

Printed Electrochemical Biosensors

Message from the Guest Editor

This Special Issue aims to highlight advances in the fabrication, modification, and analytical usefulness of printed electrochemical biosensors. Contributions to this Special Issue may include but are not limited to:

- Electrochemical sensors produced or modified via printing technologies, such as 3D printing, screenprinting, plotter printing, wax printing, etc.;
- Application of printed sensors in electrochemical biosensing.

Guest Editor

Prof. Dr. Christos Kokkinos

Department of Chemistry, National and Kapodistrian University of Athens, 11527 Athens, Greece

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Laustruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
