

## Special Issue

# Interaction between Microalgae and Light: Biotechnological Insights

### Message from the Guest Editor

Microalgae have emerged as promising candidates in combatting the current climate and energy challenges. Still, scientific and technical obstacles must be overcome to allow microalgal biotechnological to reach its full potential. Among these, a better understanding and improved manipulation of the interaction between microalgae and light are paramount. This Special Issue will highlight and discuss recent advancements in those key research fields. We expect our discussion to contribute to the biotechnological use of the interaction between microalgae and light. **Keywords**

- microalgae
- light
- chloroplast
- fluorimetry
- non-photochemical quenching
- pigments
- production
- numerical modeling
- photobioreactor
- flashing light effect

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Massimo Negrini  
Department of Morphology, Surgery and Experimental Medicine,  
University of Ferrara, Ferrara, Italy

---

#### Author Benefits

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed, PMC, Inspec, CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Biotechnology and Applied Microbiology)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
