

Special Issue

Birds and People

Message from the Guest Editor

This Special Issue will consider original articles or reviews that substantially contribute to our knowledge regarding the role of people (citizens) in the study and conservation of wild birds in protected and/or modified landscapes. Studies can focus on particular bird species or communities and involve from small to large spatial scales. We welcome studies about (1) how birds and birding connect people with nature; (2) the role of local and regional communities in the study and conservation of birds; (3) the involvement of people with professional ornithologists; (4) the participation of people in citizen science projects, especially those that organize databases; (5) comparisons of the data produced by scientists and citizens; (6) educational projects devoted to the knowledge, study and conservation of birds; and (7) citizens' perception and knowledge of birds. Thus, this Special Issue will welcome studies that examine the role of non-professional ornithologists for the advancement of scientific research, knowledge and the conservation of birds, as well as education.

About the Journal

Message from the Editor-in-Chief

Birds (ISSN 2673-6004) is an international, peer-reviewed, and open access ornithological journal. It publishes original ornithological research articles, reviews, and communications that offer substantial new insight into any field of study that involves wild birds, with special emphasis on bird ecology, communities, conservation, and behavioral ecology. Multidisciplinary papers related to birds will be considered. There is no restriction on the maximum length of the papers. Our aim is to encourage scientists to publish their theoretical, basic, applied, and experimental research in *Birds*. Full study methods and/or experimental details must be provided for research articles so that the results can be reproduced.

Editor-in-Chief

Dr. Jukka Jokimäki
Arctic Centre, University of Lapland, 96101 Rovaniemi, Finland

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.8 days after submission; acceptance to publication is undertaken in 6.6 days (median values for papers published in this journal in the first half of 2025).
