Deadline for manuscript
submissions:

closed (1 August 2023)

Message from the Guest Editor

Vision and cognition are cooperative processes that include information input and processing in the brain. Cognition is the ability to locate reason and comprehend and remember information. Recently, more and more scholars have noticed changes in visual function such as eye movements in reading, and visual changes in patients with Alzheimer's and Parkinson disease. Vision loss impedes the performance of tasks (e.g., reading, socializing) and may lead to behavioral changes and cognitive decline. We aim to explore the role of vision and visual perception in human performance, which includes color perception, face and object recognition, attention, memory, and so on.

Authors are encouraged to submit novel research that addresses the role of vision and cognition, or findings relating to new methods and techniques. We also welcome the submission of studies related to high-level human-machine interactions. Contributions should link those to relevant brain mechanisms and neuroscience opinions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
