Deadline for manuscript submissions:

closed (1 April 2024)

Message from the Guest Editor

Dear Colleagues,

Aggression is a common behavior in the animal kingdom used to establish dominance, social hierarchy, and acquire resources. While aggression is important for survival, it can also lead to extreme violence in humans. Therefore, it is crucial to understand the biological mechanisms and neuropeptide pathways behind aggression in order to develop effective treatments. This Special Issue will feature experts in the field discussing their research on aggression across multiple animal species. The goal is to identify biomarkers, neuropeptides and their pathways, and neuronal subtypes to better understand aggression and develop targeted therapies to regulate it.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
