Deadline for manuscript submissions:

closed (31 July 2023)

# **Message from the Guest Editors**

Dear Colleagues,

Alzheimer's disease is the leading cause of dementia among the aged population and is recorded as one of the most well-known medical problems today. Late-onset Alzheimer's disease (LOAD) is a complex heterogeneous disease. As of now, there are neither modification treatments nor a cure found for this compelling disease. As there has recently been an increase in the aging population around this world, the need for designing novel biomarker and therapeutic targets has become more vital toward achieving these aims. However, mechanisms linking Alzheimer's disease and cognitive impairment are also not clearly elucidated. Throughout the decades, many hypotheses have been developed to explain the pathogenesis of Alzheimer's disease, including  $A\beta$ -amyloid hypothesis,  $A\beta$ -amyloid hypothesis, presenilin hypothesis, Ca2+ dysregulation hypothesis, lysosome hypothesis, infection hypothesis, and achieve these tau hypothesis. aims. comprehensive knowledge of the prime molecular mechanisms of Alzheimer's disease determining cognitive impairment is required, which will ultimately lead to therapeutic targets.

## **Editor-in-Chief**

Prof. Dr. Stephen D. Meriney Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

## **Message from the Editor-in-Chief**

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, CAPlus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
