Message from the Guest Editor

Dear Colleagues,

The goal of this Special Issue is to discuss the use of novel treatment modules to improve standard care for anorexia nervosa. Special attention will be given to two aspects, in particular: 1) the development and implementation of personalised approaches and 2) treatment adaptations based on i) age (i.e., children and adolescents vs. adults), specific comorbidities (e.g., affective and personality disorders, neurodevelopmental disorders) and ii) illness duration (i.e., short vs. longer duration). Scientific contributions based on the use of multimodal assessment methods, including psychometric measures, neuroimaging techniques and cognitive and neuropsychological testing are strongly encouraged.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
