Division of Child Neurology, Brain and Neuroscience, Faculty of Medicine, Tottori University, Tottori, Japan

Dr. Ayataka Fujimoto

Comprehensive Epilepsy Center, Seirei Hamamatsu General Hospital, Hamamatsu 430-8558, Japan

Deadline for manuscript submissions:

closed (5 November 2021)

Message from the Guest Editors

Corpus callosotomy is an established surgical option for palliative treatment of medically intractable epilepsy, especially for seizures with "drop attacks". At this time, the vagus nerve stimulation is compared with this intervention, and at this time, pros and cons are discussed about the intervention. However, even the words "drop attack" have not been well assessed, can we discuss the corpus callosotomy?

The procedure is also called "split brain surgery". By disconnecting the corpus callosum, one says that we make two men in one. However, one also says that the efficacy and safety of the procedure for medically intractable epilepsy to prevent injuries from the drop attack. The aim of this Special Issue is to focus on the efficacy, sequelae, so-called drop attack, and the positive and negative aspects of the corpus callosotomy.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
