submissions:

closed (25 April 2023)

Message from the Guest Editors

Hypnotizability is the degree to which a person can generate modified experiences by reducing bottom-up, sensory-driven processes, and instead placing emphasis on top-down, concept-driven processing. Usually, these effects occur in response to suggestions, which are normally preceded by an induction. The ability to achieve such “hypnotic effects” implies considerable cognitive flexibility. Unsurprisingly, there are cognitive-emotional and physiological correlates of hypnotizability that are detectable outside of the hypnosis context, i.e., in everyday life.

The aim of this Special Issue is to collect novel contributions from scientists and clinicians in order to highlight the role of hypnotizability and hypnosis in cognitive science, neurophysiology, integrative physiology and medical disciplines from the perspective of a body–mind interaction.

Studies of the differences and similarities between hypnotic and placebo responses, hypnosis and other altered states of consciousness, and pharmacological and physical treatments are welcome. Case reports will not be considered for publication.

an Open Access Journal by MDPI

Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
