Message from the Guest Editors

The COVID-19 pandemic is a severe stressful life event that can trigger psychopathological symptoms in clinical populations with psychiatric disorders, but also in individuals or in those with a pre-existing psychiatric vulnerability. This is particularly relevant to the development, exacerbation, or relapse of obsessive-compulsive symptoms such as pathological contamination fears in individuals with obsessive-compulsive disorders, or trauma-related conditions such as adjustment disorders and post-traumatic stress disorders.

To date, the effects of the pandemic on people with OCD or trauma-related disorders have not been sufficiently examined in the literature. The impact of the pandemic on the onset of obsessive-compulsive or traumatic symptoms in the community, but also the development of intervention strategies for such conditions, represent other research areas that deserve more scientific attention.

The present Special Issue of Brain Sciences aims to collect international papers focused on bio-psychosocial vulnerability factors and/or intervention strategies for OCD and trauma-related conditions in the context of the COVID-19 pandemic.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
