Message from the Guest Editors

Dear Colleagues,

In recent decades, research on nutritional behavior has been expanded and enriched. Not only have new forms of eating disorders been defined, but it has also been noted that problems related to food intake can be cross-cutting for very different populations and indicate dysfunctional strategies for coping with stress. This Special Issue is focused on advances in studies of the prevalence, prevention, and intervention of eating disorders and food-related problems in clinical, subclinical, and specific populations. This Issue will bring together current research findings to identify new opportunities and advance the field.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
