Message from the Guest Editor

Dear Colleagues,

The key aim of this Special Issue is to bring together cutting-edge topics focused on how we can help people affected by bipolar disorders.

The main reason for this is that, in spite of notable advances in academic examinations surrounding bipolar disorders, we do not yet have evidence that this progress is reaching the 'bedside'.

Recent developments in the field show real potential for interdisciplinary collaborative research to better integrate domains including neurobiological, neuropsychological, social and clinical facets towards a better comprehension of pathogenesis and mechanisms of illness, and, critically, to prioritise translational approaches to help improve the lives of people affected by bipolar disorders.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
