Message from the Guest Editors

Dear Colleagues,

Mild traumatic brain injuries (mTBI) and concussions can cause a wide range of impairments that affect balance, cognition, vision, sleep, the autonomic nervous system, and mood. Treatment of mTBI may include cognitive, vision, and vestibular rehabilitation, as well as medications for sleep, mood, or headaches. We invite submissions for a Special Issue of *Brain Sciences* for articles related to treatment or complications of mTBI. Original basic and clinical research, case reports, review articles, meta-analyses, and systematic reviews related to this are welcomed. As research related to mTBI and concussion is quickly evolving, we hope to enhance the understanding of the complications of this condition and how they are treated.

Dr. James M. Gurley

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
