Deadline for manuscript submissions:
closed (8 October 2022)

Message from the Guest Editor

"Parkinson's disease (PD) is characterized by a range of motor and nonmotor symptoms. The classic motor features of PD, including akinesia, bradykinesia, resting tremor, and rigidity, are causally linked to the degeneration of midbrain dopaminergic neurons. In contrast, the pathophysiology of nonmotor symptoms, such as olfactory deficits, cognitive impairments, and neuropsychiatric symptoms, remains poorly understood.

The present Special Issue of Brain Sciences aims to collect international papers (research articles, narrative reviews, systematic reviews, meta-analyses, case studies) focused on the pathophysiology and treatment of motor and nonmotor symptoms of PD."

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, CAPlus / SciFinder, and other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
