Deadline for manuscript submissions:
closed (30 April 2013)

Message from the Guest Editor

Dear Colleagues,

Myelin sheaths that insulate and nourish CNS axons are produced by oligodendrocytes, highly metabolic cells that are vulnerable to trauma induced neurotoxicity and to autoimmune attack in diseases such as multiple sclerosis. This special issue will collect articles that address ongoing research into promoting myelin repair, including strategies to suppress innate immune attack, to promote endogenous repair processes, and to supplement this repair with exogenous cell grafts.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, CAPlus / SciFinder, and other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
