New Insights into Neuropathic Pain: From Diagnosis to Treatment

Message from the Guest Editor

Neuropathic pain constitutes a complex clinical challenge, and current medicine has a large spectrum of tests available to investigate the origins of this pain, analyze its functional aspects, and quantify the damage to the nervous system. These tests play a crucial role in supporting the diagnosis of various conditions, also providing fundamental information for the treatment and overall management of patients. However, many blind spots related to this type of pain exist.

This Special Issue explores neuropathic pain and its assessments from different angles. It delves into the cellular basis, the rehabilitation implications, and the most recent innovations, including new assessment and treatment procedures, innovative management protocols, and integration between diagnostic and therapeutic modalities. We encourage the submission of documents of various kinds, such as reviews, experiments, and clinical cases, with a particular focus on human subjects. Authors are encouraged to contribute documents focusing on the diagnosis, prognosis, treatment, and rehabilitation of pathologies that cause neuropathic pain from different points of view.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
