Outcome Measures and Assessment Tools Related to Neurological and Psychological Disorders

Message from the Guest Editors

In the context of rehabilitation, outcome measures are frequently used to assess the characteristics of inpatients and outpatients before any intervention, as well as to determine whether patients have made meaningful changes in their recovery processes.

We are pleased to invite you to provide clinicians and researchers with evidence-based recommendations regarding the outcome measures that should be used in rehabilitation. We are interested in review articles describing the current state of the art, as well as validation studies that culturally adapt current assessment tools, providing new information about the psychometric properties of existing or new assessment tools.

Research areas may include (but are not limited to) the following:

1. Systematic reviews and meta-analyses of existing assessment tools in rehabilitation;
2. Validation studies of existing assessment tools;
3. Psychometric studies measuring the psychometric characteristics of assessment tools;
4. Comparative studies of different assessment tools measuring the same area;
5. Cross-sectional studies for the cultural adaptation of assessment tools in specific countries.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney
Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:
reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
