Innovation on Neuropsychological and Cognitive Changes in Aging: Assessment and Intervention

Message from the Guest Editors

- The increasingly aging population is expected to cause significant health challenges, particularly with the rising prevalence of dementia. Are we prepared to address the complexities of evaluating and managing dementia on a large scale, or is a greater innovation required to meet these demands?
- Innovations entail introducing novel ideas, methods, or products to improve established practices. During the COVID-19 pandemic, innovation became essential (such as remote neuropsychological assessments and intervention), with many of those solutions now being integrated into everyday life. To advance this field, we have launched this Special Issue, focusing on innovative approaches to evaluating neuropsychological and cognitive changes in aging and improving interventions for these conditions.
- We invite research articles, case reports, and short communications that highlight advancements in this area. Submissions should clearly explain their innovative contributions and their potential impact on the field, paving the way for more effective strategies to address the challenges posed by dementia and cognitive aging.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
