Exploring Negative Symptoms of Schizophrenia: Where Do We Stand?

Message from the Guest Editors

Negative symptoms are prevalent among many individuals diagnosed with schizophrenia. Despite their significant impact, negative symptoms have often been overshadowed in diagnostic criteria, treatment approaches, and research pertaining to schizophrenia, especially when compared to positive symptoms. Additionally, there remains a lack of clarity in clinical practice regarding the definition and differentiation between primary and secondary negative symptoms. Recognizing secondary negative symptoms can enable tailored treatment interventions, especially considering the fact that these symptoms can stem from various factors such as positive symptoms, substance abuse, medication side effects, or depressive episodes.

This Special Issue aims to offer fresh insights into negative symptoms by presenting clinical tools, brain imaging studies, physiological data, and innovative treatment modalities, including medications targeting neurotransmitter systems other than dopamine, or exploring adjunctive therapies alongside antipsychotics. Research aimed at enhancing our understanding of the pathophysiology underlying negative symptoms is also encouraged.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
