Non-invasive Brain Stimulation for the Study and the Treatment of the Brain

Message from the Guest Editor

Non-invasive brain stimulation, together with neuroimaging, has contributed to the recent developments in cognitive and clinical neuroscience. Over the last decades, innovative non-invasive brain stimulation research approaches have been proposed to investigate the neuro-functional bases of motor, perceptual and cognitive functions, and deepen our understanding of how the brain responds to internal and external stimuli and guides behavior. This Special Issue will deal with recent theoretical and methodological advances in the use of non-invasive brain stimulation techniques also in combination with neuroimaging and/or neurophysiological measures to study the neuro-functional bases of perceptual, sensorimotor and cognitive functions in relation to relevant topics of psychology, cognitive neuroscience and neuropsychology. Contributions on the use of non-invasive brain stimulation as a potential tool for the treatment of brain pathologies in neurological and/or psychiatric patients with sensorimotor, cognitive or mood disorders are also welcome. We invite articles covering a range of non-invasive brain stimulation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
