Genetics of Psychiatric Diseases

Message from the Guest Editor

Genetic research has shed light on the biological pathways and mechanisms underlying psychiatric diseases. The findings suggest that disruptions in the neurotransmitter system, synaptic plasticity, immune response, and neurodevelopmental process may contribute to the manifestation of these disorders. However, it is important to note that the genetic architecture of psychiatric diseases is highly complex, involving interactions between numerous genes and environmental factors, and thus, it is difficult to determine causative effects or establish predictive genetic tests. This Special Issue aims to present a collection of studies focusing on the most recent advancements in the genetics of psychiatric diseases, including less commonly studied ones. Authors are invited to submit original research, reviews, or case reports, including the following: 1) studies using cutting-edge technology and approaches or in new populations; 2) family- or twin-based studies; 3) functional genomic or epigenetic studies; 4) reviews on the existing genetic studies. We aim to present advances in the genetic study of psychiatric diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
