Stroke, Cognition and Dementia

Message from the Guest Editors

Stroke is the second leading cause of death and the third most common cause of disability worldwide. Post-stroke cognitive impairment (PSCI), including attention, memory, executive functioning and information processing deficits, is one of the major clinical features of functional impairment after stroke. PSCI affects long-term quality of life and notably is linked with post-stroke vascular dementia. Despite the growing health, social, and economic burden of PSCI, compared to post-stroke physical impairments, treatment for PSCI is receiving less attention. Therefore, it is important to explore the pathophysiology of stroke-associated cognitive impairment and to develop therapeutic strategies which promote stroke recovery and thereby improve cognitive function.

Topics include but not limited: 1) risk factors for cognitive impairment and dementia after stroke; 2) cellular and molecular mechanisms, neuroimaging and assessments underlying the pathogenesis of cognitive impairment associated with stroke; and 3) interventions or therapies contributing to cognitive rehabilitation after stroke, such as translational clinical studies and innovative non-pharmacological interventions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
