Special Issue

Advances in Concussions

Message from the Guest Editor

Concussions, a form of mild traumatic brain injury (mTBI), have long been a concern in both clinical and athletic settings. Historically underdiagnosed and poorly understood, the field has evolved significantly over the past two decades, with increased awareness, improved diagnostic tools, and emerging evidence on long-term consequences.

This Special Issue is dedicated to showcasing cuttingedge advancements in the science of concussions. The aim is to bridge clinical practice and research by highlighting innovations in diagnosis, imaging, biomarkers, neuropsychological evaluation, and rehabilitation. We also seek to explore socio-legal implications, policy changes, and public health strategies that are shaping the future of concussion management.

Submissions may include novel diagnostic techniques, emerging treatment protocols, pediatric and adolescent-focused research, chronic traumatic encephalopathy (CTE) insights, and technology-driven monitoring systems. Through this Special Issue, we strive to provide a comprehensive, forward-looking resource that drives the field toward improved outcomes for those affected by concussions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
