

## Special Issue

# Traumatic Brain Injury and Disorders of Consciousness

### Message from the Guest Editors

The diagnosis and management of disorders of consciousness (DoC) due to acquired severe brain injury remain challenging for clinicians. Important information has been obtained on these issues owing to a bulk of functional neuroimaging, advanced electrophysiology, and clinical studies performed on relatively large samples of patients with prolonged DoC and traumatic brain injury. However, there are still few guidelines available for the management of these very fragile individuals. Therefore, improved and innovative diagnostic paradigms, treatment strategies, and management protocols need to be developed and validated. In this Special Issue, we would like to offer readers the latest experimental researches and overviews on these hot topics.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
