Special Issue

Current Research in Neurosurgery

Message from the Guest Editors

Neurosurgical daily practice deals with different human diseases ranging from trauma to CNS tumors to cerebrovascular diseases, such as spinal and peripheral nerve lesions. The complexity of each neurosurgical issue has proven the necessity for developing subspecialties. In this complex scenario, many research groups worldwide push the boundaries of known ways in order to improve the quality of clinical and surgical practice. This Special Issue aims to highlight the current research in the neurosurgical field underlining news about anatomical corridors, surgical approaches, surgical techniques, new technologies, revision of indications/contraindications, and complications. In this Special Issue, original research articles and reviews are welcome. Research areas may include the following: Neuroanatomy, Neuro-Oncology, Skull Base, Functional Neurosurgery, Pediatric Neurosurgery, Vascular and Endovascular Neurosurgery, Spine Surgery, Peripheral Nerve Surgery, and Endoscopic Minimally Invasive Neurosurgery. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney
Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
