Stroke: Epidemiology, Diagnosis, Etiology, Treatment, and Prevention

Message from the Guest Editor

Cerebrovascular diseases and strokes belong to a group of diseases that are among the most important in medicine due to their high incidence, prevalence, and severity. They are the leading causes of disabling sequelae in adults and one of the main causes of death worldwide. A highly positive fact is that this disease has great potential for prevention and specific treatment. These facts make the study and management of these diseases mandatory for all physicians and public health programs. Up-to-date knowledge in this field is essential. In recent decades, significant progress has been made in improving knowledge of their pathophysiology, epidemiology, diagnosis, and treatment. Significant advances have been observed in different aspects, facts translated by many high-level publications and important multicenter clinical trials, which underpin knowledge and conduct. This Special Issue, which specifically addresses cerebrovascular diseases and stroke in all their aspects, will focus, clearly and objectively, on up-to-date works in this field, aiming to contribute to progress and bring the enable the best treatment for the management of these patients.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
