

Special Issue

Applied New Technologies to Investigate and Support Normal and Pathological Cognitive Aging

Message from the Guest Editors

Technology has significantly changed the practice of current clinical neuropsychology. For instance, as digital assessment methods grow, early identification of persons with emergent neurological illness can be improved, and more timely effective treatments can be planned. More sophisticated and less invasive neuroimaging techniques with better spatial-temporal resolution can afford a better understanding of the neural contributors to cognitive aging. This Special Issue aims to attract empirical articles dealing with the impact of applied technologies (i.e., computerized neuropsychological assessments, virtual reality training, innovative neuroimaging techniques, neuromodulation tools, etc.) on the assessment and training of cognitive domains (i.e., memory, temporal and spatial orientation, attention, concentration, and executive functions) in patients and healthy controls. Studies recruiting large samples of participants and/or adopting a longitudinal perspective are strongly encouraged. Review articles on the current state-of-the-art in the field are also welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
