

## Special Issue

# Twin Brains: From Identical Genes to Different Persons

### Message from the Guest Editor

Determining the role of genetic processes and their mutual influence with environmental factors across human life has been tricky and fascinating. The nature–nurture dilemma has its paradigmatic situation in identical twins, which have been a natural experiment and an incomparable source of information since the gemmology studies, have been formally conceived. One of the goals of this Special Issue is to collect and organize a robust set of data to share across interested investigators and readers and provide meanings and future perspectives on the various twin-research aspects. New data from studies on identical twins that analyze the similarities and differences in terms of neuro-structural, neuro-functional, cognitive, and non-cognitive aspects are particularly welcomed. It is also open to the consideration of investigations of identical twins across the entire spectrum of biology from normality to pathologic conditions. Epidemiological investigations using a large amount of data on cognitive, behavioral, genetic, and molecular aspects assessed employing any clinical, imaging, physiological, or other validated research or clinical technique or method will be welcomed.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
