Reviews in Neuropsychology

Message from the Guest Editor

Scientific progress and advances in neuropsychology have produced a very large number of papers in recent decades, making it difficult to update our knowledge in fields not strictly related to our areas of interest. For this reason, critical reviews about different sectors of neuropsychology are essential to provide an updated review of the theories, hypotheses, methodologies, and recent development of knowledge. The aim of this Special Issue is to collect a series of reviews on the nowadays state-of-the-art indifferent neuropsychological domains (language, attention, memory, functions, perception, spatial cognition, emotion, social cognition, etc.). Contributions reviewing both experimental and clinical studies within the current theoretical frameworks are welcome. **Keywords**

- language and learning disabilities
- human navigation and spatial cognition
- attention, emotion, perception, motivation
- memory, executive functions
- social and affective neuroscience
- visual perceptual awareness
- visuomotor adaptation
- unilateral neglect
- neuropsychological rehabilitation

Guest Editor

Prof. Dr. Cecilia Guariglia

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
