Special Issue

New Advances in Alzheimer's Disease and Other Associated Diseases

Message from the Guest Editors

The Alzheimer dementia (AD) is a neurodegenerative disorder that manifests with progressive cognitive impairment associated with a loss of functional autonomy. The prevalence of neurodegenerative disorders is increasing as our population gets older. Although current research biomarkers have been useful in the understanding of neurodegenerative diseases including Alzheimer's Disease, more data is necessary to better characterize clinical phenotypes and comprehend the neurobiology of neurodegenerative diseases and further develop efficacious treatments.

This special issue of Brain Sciences aims to present a collection of studies detailing the most recent advances in the field of Alzheimer's Disease and related diseases. Authors are invited to submit cutting edge research and reviews that address a range of topics in Alzheimer's Disease and related diseases including the following: epidemiology, neurobiology, biomarkers, genetics, neuropsychiatry, pathology, clinical trials, including pharmacological and/or non-pharmacological treatment strategies. We aim to present advances in neurodegenerative diseases research.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney
Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
