Innovative Research on the Health, Physiological and Neuroscientific Consequences of Mental Health Conditions

Message from the Guest Editor

Mental health conditions can significantly impact physiological responses, health risks, and neuroscientific findings. Developing research has broadened understanding of how mental health difficulties such as trauma/PTSD, depression, and anxiety (among other conditions) may affect health status and physiological and neurological processes. This Special Issue will highlight innovative findings related to the health consequences of mental health conditions and provide a wide cross-section of research for a multidisciplinary audience. Studies with translational relevance are of special interest given the need for interventions to address the range of health consequences that stem from long-term mental health symptoms.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
