Chronic Pain: Assessment, Diagnosis, and Management

Message from the Guest Editor

Chronic pain is one of the most common interdisciplinary health problems worldwide, and can lead to somatic and mental complications, including depression and even suicide attempts. The identification of pain etiology can be challenging; thus, standard pharmacological management may not be satisfactory. Despite the significant advances made in understanding the molecular basis of pain generation, imaging the brain areas related to pain regulation and understanding the mechanisms leading to pain chronification, pain therapy can still fail. This Special Issue of *Brain Sciences* aims to present a comprehensive collection of studies detailing the most recent advancements in the field of chronic pain. Authors are invited to submit original research and reviews that address a broad range of topics related to various types of chronic pain, including neuropathic, nociceptive, musculoskeletal, inflammatory and psychogenic pain.

We cordially invite you to submit contributions to this Special Issue that will disseminate vital knowledge on this crucial and undertreated clinical problem.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
