Relationships Between Disordered Sleep and Mental Health

Message from the Guest Editor

Sleep-related problems can significantly impair mental health, which can also affect the quality and characteristics of sleep. For example, adults and children who are diagnosed with psychiatric conditions commonly demonstrate sleep-wake disorders. In addition, circadian rhythm disruptions have also been shown to affect mental health, such as causing depressive symptoms in people with shift-work sleep disorder. There is therefore a need for scientific research regarding the biological and psychological mechanisms connecting disordered sleep and mental health outcomes. Novel discoveries in this field are thus critical in order to determine novel targets for interventions that could enhance the mental health of individuals and populations. I invite you to submit your data-based articles, meta-analyses, or systematic reviews to this Special Issue. This Special Issue aims to present recent findings concerning sleep and mental health to provide new insights into the mechanisms, causes, outcomes, and possible treatments. The presented evidence may include a variety of study designs, such as preclinical work, clinical trials, and epidemiologic studies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
