

## Special Issue

# Clinical Translation in Disorders of Consciousness: New Pathways and Challenges

### Message from the Guest Editors

Advancing the translation of neuroscience into everyday care for patients with disorders of consciousness (DoC) remains one of the field's most pressing challenges. Recent work has underscored the importance of moving beyond single-technique investigations toward integrative, patient-centered approaches that connect mechanistic research, clinical guidelines, and implementation science. This Special Issue welcomes contributions that employ multimodal methodologies (e.g., neuroimaging, electrophysiology, neuromodulation, and digital health), leverage interdisciplinary collaborations across neuroscience, rehabilitation, psychology, and bioengineering, and adopt patient-centered frameworks such as individualized rehabilitation pathways and family-engaged care models. By featuring studies that bridge experimental and clinical domains, we aim to stimulate dialogue on how diverse methods and perspectives can collectively advance diagnosis, prognosis, and treatment in DoC. We hope this issue will serve as both a reflection of current challenges and a catalyst for future translational research in this field.

### Guest Editors

Dr. Caroline Schnakers

Research Institute, Casa Colina Hospital and Centers for Healthcare, Pomona, CA 91767, USA

Dr. Katherine O'Brien

1. TIRR Memorial Hermann, Houston, TX 77030, USA  
2. Department of Physical Medicine & Rehabilitation, McGovern Medical School, The University of Texas Health Science Center at Houston, Houston, TX 77030, USA

### Deadline for manuscript submissions

15 April 2026

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
