# New Insights into Mental Health Research for Neurological and Psychiatric Disorders

## Message from the Guest Editors

In recent decades, there has been growing recognition of the complex and often overlapping relationship between mental and neurological disorders. Conditions such as depression, psychosis, epilepsy, Parkinson's disease, multiple sclerosis, and dementia frequently co-occur or share common neurobiological mechanisms, underscoring the need for integrated approaches in both research and clinical practice. Mental health, once considered secondary in the management of neurological diseases, is now acknowledged as a central component of overall brain health.

This Special Issue aims to highlight cutting-edge research at the intersection of psychiatry, neurology, and psychology, promoting a multidisciplinary understanding of how mental health is affected in individuals with neurological conditions.

Topics of interest include psychiatric symptoms in neurological disorders, cognitive-behavioral interventions, mental health disparities, and the use of AI or neuroimaging in dual-diagnosis populations. By bringing together diverse perspectives, this Special Issue aims to foster new insights and drive progress in the care of patients living with both mental and neurological conditions.

# **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. USA

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

### **Recognition of Reviewers:**

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
