

Special Issue

From Diagnosis to Care: Cognitive Challenges and Innovations in Multiple Sclerosis

Message from the Guest Editors

This Special Issue focuses on the challenges and advancements in the diagnosis, treatment, and care of MS patients, with a particular emphasis on cognitive and neuropsychological aspects. The goal is to bring together research on innovations in neuropsychological testing, the role of primary caregivers, and the impact of biomarkers on clinical decision-making. Research on vulnerable populations, occupational challenges in neurodegenerative diseases, and the latest advancements in diagnostic biomarkers are encouraged. This Special Issue aims to present innovative studies that could transform intervention strategies and improve patient outcomes. We invite researchers, clinicians, and experts in neuropsychology, rehabilitation, and biomarkers to submit their latest studies. We are seeking papers that explore both innovative approaches and unresolved challenges in MS to advance knowledge and treatment of the disease.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
