

## Special Issue

# Latest Research on the Treatments of Speech and Language Disorders

### Message from the Guest Editors

Advancing our understanding and treatment of speech and language disorders remains a priority for researchers and clinicians worldwide. Parallel to recent and innovative technological achievements, the treatment of speech and language disorders requires the implementation of innovative approaches that integrate emerging technologies with evidence-based practices. This Special Issue showcases the latest research and interventions, including the use of neurostimulation techniques to modulate neural activity, virtual reality (VR) platforms to create immersive and engaging therapeutic environments, and artificial intelligence (AI) systems to personalize and optimize treatment plans. These advancements are complemented by breakthroughs in traditional behavioral methods therapies. This Special Issue also explores strategies that address challenges related to accessibility and tailor interventions to diverse populations. By focusing on cutting-edge technologies and their integration into clinical practice, this Special Issue aims to inspire scientific innovation and accelerate progress in the treatment of speech and language disorders.

### Guest Editors

Dr. Jubin Abutalebi

Centre for Neurolinguistics and Psycholinguistics (CNPL), Università Vita-Salute San Raffaele, Milano, Italy

Dr. Mehdi Bakhtiar

Speech and Neuromodulation Laboratory, Unit of Human Communication, Learning and Development, Faculty of Education, The University of Hong Kong, Hong Kong

### Deadline for manuscript submissions

10 August 2025

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
