Inhibitory Control across Mental Disorders

Message from the Guest Editor

Inhibitory control is a crucial cognitive function that enables individuals to suppress or inhibit prepotent responses or behavior and impulse control and promote attentional focus and emotion regulation. Research suggests that inhibitory control deficits may contribute to various mental disorders. This Special Issue aims to bring together high-quality research papers, reviews, and theoretical perspectives on inhibitory control in mental disorders and discuss the implications for clinical practice and future research. Topics may include:

- The neural mechanisms underlying inhibitory control: from order to disorder;
- The role of impaired inhibitory control in the development of mental disorders;
- The behavioral and cognitive consequences of impaired inhibitory control deficits in mental disorders, including impulsivity, emotion regulation, and decision making;
- The effectiveness of inhibitory control training in mental disorders;
- The implication of non-invasive brain stimulation in the modulation of inhibitory control.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
