Concussion and Its Rehabilitation

Message from the Guest Editors

Concussion, a form of mild traumatic brain injury (mTBI), represents a major public health concern due to its high incidence and potential for long-term symptoms, including cognitive, emotional, and physical impairments. Although traditionally considered a transient injury, a significant subset of patients experiences prolonged recovery, highlighting the need for improved understanding and targeted rehabilitation strategies. This Special Issue seeks to consolidate current research and clinical advancements in the diagnosis, treatment, and rehabilitation of concussion. Emphasis will be placed on the pathophysiological mechanisms of injury, identifying predictive factors for recovery, and developing innovative neurorehabilitation techniques and interdisciplinary approaches to managing persistent symptoms. We welcome contributions exploring neuroimaging biomarkers, digital and wearable technologies, neurocognitive therapies, exercise-based interventions, and AI-driven diagnostic tools. Studies focusing on vulnerable populations, such as athletes, military personnel, and children, are particularly encouraged.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
