Neuroregenerative Plasticity in Health and Disease

Message from the Guest Editor

Over the past three decades, there has been enormous scientific progress made with regard to adult neurogenesis in experimental animals. However, the occurrence of neurogenesis in the adult human brain appears to be a longstanding scientific debate. Therefore, the main goal of this Special Issue is to unveil the potential mechanisms underlying the regulation of neurogenesis in health and disease and decipher the potential signaling pathways and possible therapeutic targets to modulate the neurogenic process for the betterment of neurocognitive function in the elderly and subjects with disease conditions. Authors are welcome to submit original experimental research articles and review articles that cover the history, basic concepts, controversies, current research, clinical implications, technical advancements and roles of pro-neurogenic drugs, toxins and chemical detriments, as well as future perspectives related to the underlying biochemical, molecular and cellular mechanisms regulating adult neurogenesis and pharmacological and gene-editing strategies to treat dementia by mitigating aberrant hippocampal regenerative plasticity.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
