The Biopsychosocial Facets of Alexithymia and Its Role in Psychiatric, Psychosomatic, and Medical Illnesses

Message from the Guest Editors

It has been suggested that alexithymic subjects may scarcely respond to both pharmacotherapy and psychotherapy. The characteristic attributes of alexithymic behavior are predominantly manifest in social interactions with high emotional significance. The affect-avoiding interpersonal pattern behavior showed by such subjects is often maladaptive and may elicit disorders and conflicts in important relationships, finally contributing the risk of the development of psychiatric symptoms such as depression or anxiety, thus increasing the risk of suicide.

Therefore, the aim of the present Issue is to give an update on biopsychosocial aspects of alexithymia concerning several points of view (neurobiological, structural, functional, psychological aspects, etc.). Both theoretical and empirical papers are welcome, as well as reviews, mini-reviews, interesting case-reports, and commentaries. All areas concerning alexithymia may be welcomed, from neurobiological and imaging findings to psychopathological and psychological issues. In addition, review papers or original studies on psychosomatic diseases and somatic symptoms would be of great interest.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
