

## Special Issue

# The Interplay between Cognition and Emotion in PTSD

### Message from the Guest Editors

The sequelae of Posttraumatic Stress Disorder (PTSD) extends beyond emotional processing. PTSD is associated with impairments across many domains of cognitive functioning, including verbal learning, memory, executive functioning, and processing speed. These impairments are, in turn, associated with significant functional impairment among individuals with PTSD.

Advances in identifying cognitive and affective alterations in PTSD, the ways that cognitive and affective processing interact in PTSD is less understood. This Special Issue of aims to present a collection of papers on *"The Interplay between Cognition and Emotion in PTSD"* that will advance our understanding of the relation between emotion and cognitive functioning in PTSD and will highlight novel or developing interventions aimed at reducing these effects. Authors are invited to submit empirical research that addresses the interplay between cognitive functioning, emotion, and functional impairment in PTSD, as well as studies investigating clinical interventions aimed to address these challenges. Papers that include biomarkers, neuroimaging, or other novel approaches to exploring these questions are encouraged.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

---

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
